SEMI REALISTIC

STORY SLEEVE

HEMLOCK
TATTOOS

WATER COLOUR

Watercolor tattoos are a vibrant style of body art that mimic the fluid and soft appearance of watercolor paintings. Characterized by bright, blended colors with minimal outlines, they create a dreamy, ethereal effect, perfect for nature-themed designs like flowers and animals.

REALISTIC PORTRAIT

Realistic portrait tattoos are detailed and lifelike, capturing the exact likeness of a person with precise facial features and expressions. Subjects often include loved ones or celebrities, making them a meaningful tribute.

These tattoos evoke strong emotions and serve as memorials or celebrations of admired individuals.

MINIMAL TATTOOS

Minimal tattoos are simple and elegant, featuring clean lines and small designs often in black ink. Popular for their subtlety, they typically include geometric shapes, tiny symbols, or delicate lettering, offering a meaningful yet unobtrusive form of body art.
